An SOS Mom very happy with 4 siblings newly brought to her Family house in the village.

Françoise has turned into a beautiful young lady. I am happily writing to greet and send you the sponsorship letter of Françoise. You have been there, with her, all along her journey in the village!

Because of you!

She is growing well either in height or weight. Her health situation is becoming better. Usually, she was used to having a serious cough and flu during rainy and cold seasons but this last year 2014, she is healthy and fine.

At her school in the village, the courses include Mathematics, French, English, Kinyarwanda and Sciences and Elementary Technology. In her schooling, Françoise is struggling. Her teacher advised her SOS mother Languida, that Françoise

should repeat her class. Her educators continue to help her. Her teacher gives her special attention in class. Where she has confusion, he gives more explanations and more exercises to do at home. Languida often pays her visit at school to encourage her. All children in the village benefit by a special coaching in their courses every afternoon. They are always accompanied by their SOS aunts. Françoise is among them. Her SOS aunt Claire tries her best to give Françoise more explanations and examples related to what she learns at school. Françoise keeps well her school materials. Her school bag is always clean and safe. Languida awarded her in front of the other in order to encourage other children to keep well their school material and bag. After her primary studies, Françoise dreams to join a vocational school. Many thanks for your financial support. Without you, this child could not afford school.

If you could see Françoise dancing,

A young girl from our village in Albania in an SOS summit discussing 2030 vision.

VILLAGES
RWANDA**

Françoise has joined the school cultural and traditional dancers' troop. They practice twice a week with their trainer who is hired by the village. Nowadays, she is dancing well. 'I will keep practicing till the day I will be among the best dancers in the village,' says Françoise.

Delphine and Yvette are her best friends. They like to play together whenever they are free. They skip the rope, play with the tennis ball or run around the compound.

Françoise knows how to perform some home chores like washing the cups, arranging her clothes in the wardrobe and ridding the table.

Her favorite meals are potatoes chips, rice, and soup with cassava bread. Among the fruits, she likes avocados, passion fruits and oranges. As for drinks, Françoise likes porridge, cow milk and pine apple juice.

These Christmas holidays, she went to her biological family. Her maternal aunt came to pick her.

When she came back, at the end of the holidays, she was happy to share with other children what she did on the holidays. She told other children, 'I used to stay home when my aunt was going to market.

When it was raining, I picked the clothes she left out on the drier and put them in the basket. I went to fetch water with my cousin, Vanessa and look after the little baby'.

Without your financial support, Françoise should have not got a family, sisters and brothers. I thank you very much for your kindness and generosity.

Yours sincerely,

TWAMBAZIMANA Gaspard
National Sponsorship Co-ordinator
